

In this week's recap: Stocks rally in the face of a changing landscape.

Weekly Economic Update

Presented by Midland Wealth Management, March 21, 2022

THE WEEK ON WALL STREET

With the Fed embarking on a new course of monetary tightening amid continued fighting in Ukraine, stocks staged a powerful, broad-based rally last week.

The Dow Jones Industrial Average jumped 5.49%, while the Standard & Poor's 500 gained 6.16%. The Nasdaq Composite index soared 8.18% for the week. The MSCI EAFE index, which tracks developed overseas stock markets, advanced 5.17%.^{1,2,3}

STOCKS ROAR

After surrendering gains on Monday, stocks surged higher for four consecutive days. The rally was propelled by strong economic data, the outcome of last week's Federal Open Market Committee (FOMC) meeting, and reports that Russia made interest payments on its sovereign debt, avoiding technical default.

The uptrend began with a drop in oil prices and a lighter-than-expected wholesale inflation report. Stock prices initially buckled following Wednesday's hawkish FOMC announcement, but turned higher as investors interpreted the Fed's news as a welcome plan to combat inflation. Stocks extended their gains into the final two trading sessions, cementing their best weekly performance since November 2020.⁴

THE FED'S PLAN

For the first time since 2018, the Federal Reserve hiked the federal funds rate, increasing it by 0.25% and signaling that it expected to raise rates at a faster pace than originally outlined in December. Based on its projections of future fed fund rates, the Fed may implement seven quarter-point rate hikes this year and another three to four next year.⁵

In a statement following the FOMC meeting, Fed officials expressed rising concerns over inflationary pressures made more acute by the war in Ukraine. Members also indicated that they would soon announce a plan to reduce the Fed's \$9 trillion balance sheet.⁶

THE WEEKLY RIDDLE

Two lawyers sit at opposite ends of a large conference table. Nothing is in between them but the table, yet they don't see each other. How is this possible?

LAST WEEK'S RIDDLE: You are at sea, it is mid-July, and your ship has reached a unique spot on earth. If you sail north, it will be summer; if you sail south, it will be winter. If you sail east, it will be Friday, but if you sail west, it will be Saturday. Precisely where in the world are you? (Hint: your ship is in the Pacific Ocean, near the island nation of Kiribati.)

ANSWER: You are at the intersection of the International Date Line and the Equator.
